

AK 103SE

Weapons offered for delivery is a classic model Kalashnikov assault rifle (AKM), caliber 7.62x39.

However, this model 103SE has a number of design differences from basic model, the main of which are:

- **the receiver is made of steel sheet 1.5 mm thick (original AKM - 1.0 mm);**
- **Reinforced liner receiver;**
- **reinforced barrel, made by machine gun technology, cold rotational forging;**
- **increased layer of chrome coating in the bore.**

These design changes allow for minor increase the mass of the machine, significantly increase the structural rigidity weapons and its strength, increase barrel wear resource and increase accuracy firing when firing in automatic mode.

Caliber, mm 7,62

Cartridge, mm 7,62x39

Length, mm: 880

Width, mm : 70

Height (with magazine), mm : 250
