

SCRD-04 Omega Tactical 8 Reticle Red & Green Dot Sight

Exclusive 8 Reticles Red and Green Dot, Extreme Tactical, QD Mount, US Design in High End Quality , Designed for Real Firearms

The new vector optics diamond edition of optics is the highest quality line vector optics carries. All of the vector optics diamond line is designed in the United States of America by a US military defense contractor using all state of the art circuitry and materials this is not your average sight. Quality Control is 10x that of the other lines offered by vector optics or any other like company.

Originally the diamond line of optics were designed for commercial / law enforcement use when first designed. Now available to the general consumer the diamond edition line will fast become a popular line of optics where the average consumer is wanting more out of an optic they want mil-spec quality without the mil-spec price and with the diamond line you get it. The diamond line is all hand built and tested for a lifetime of heavy use. So when you need to depend upon a sight pick diamond where diamonds last forever.

Some ask what is reactive sighting and what makes it different than a reflex system it is the sight's ability to react to the shooter's needs:

- Ultra wide field of view
- 8 reticle choices
- Color change as quick as a button push
- Uses multiple power sources
- Parallax perfect parallax correction
- 120 hz cet Led Refracting Diode for a seamless reticle view
- Powered by the most powerful force in the universe the Sun
