# LOGISTICS APPLICATION FOR MarSec Companies

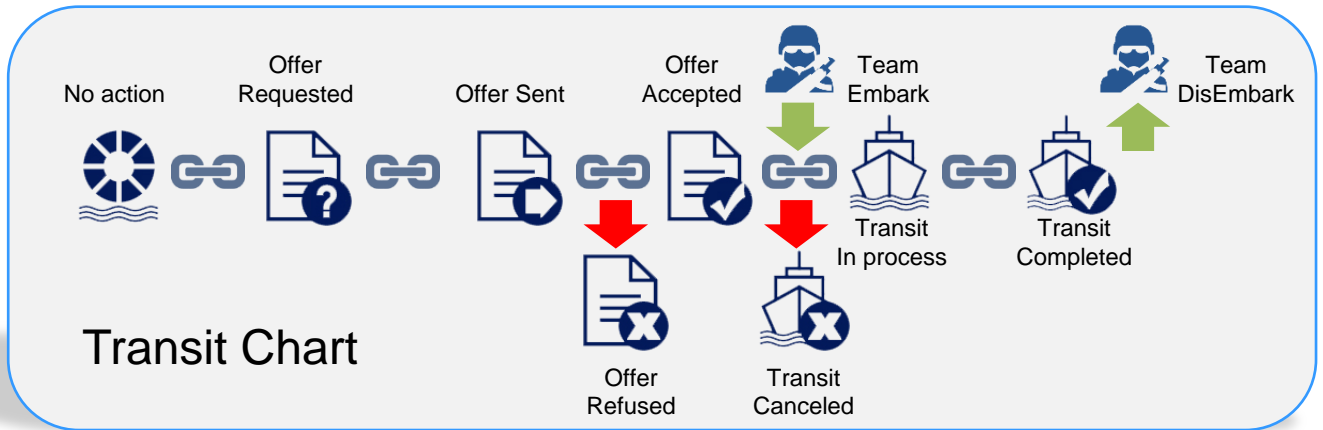

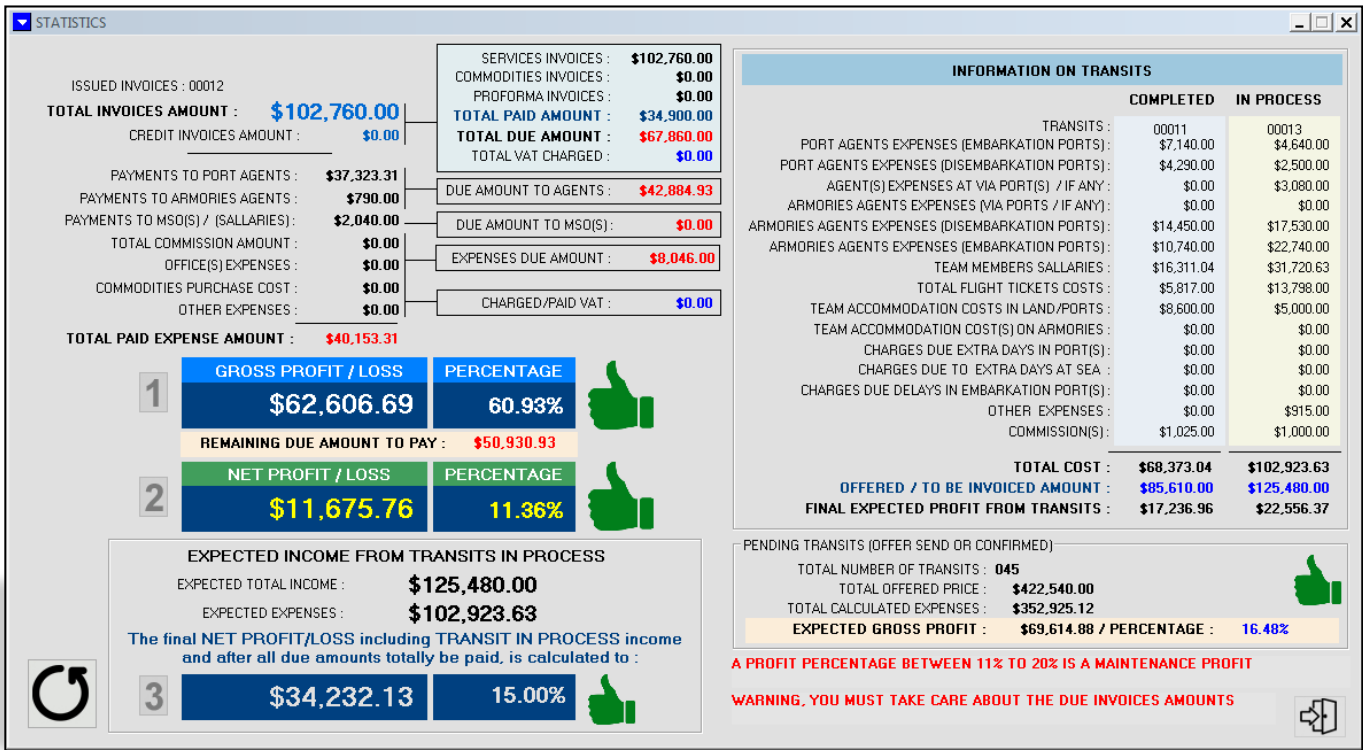

We have developed a multi function maritime security logistics software in order to make your business more and more easy.

Software is already in error free running mode - Version 1.1 - while it is day by day optimized according to your needs.

Through our MarSec software you can build,

- Clients/Contacts Database
- Vessels Database
- MSO Database including their certificates
- Agents Database
- Ports and Distances Database
- Maritime Security Equipment Database
- Daily reports of Company's sales
- Transits database
- Invoices and Income Database
- Expenses Database
- Monthly Statements (profit/Loss statistics)
- Profit / Loss Calculations
- Year by year sales and costs
- .... and more

Software is working in a network basis mode - unlimited users - under any Microsoft Windows Version and under security levels regarding who can use the program and in which level (User, Director, Admin).
